News

Hello everyone! I'm Abby, your new Library Director. I'm happy to be working in Erving and looking forward to getting to know all of you! I received my Master's in Library and Information Science from Simmons University in 2010 and have a background in managing library service points, collections and implementing new technology. I also teach a class on technology for librarians at Simmons on the weekend. I live in Greenfield and in my free time I enjoy kayaking the CT river and consuming all types of media.

Please join us anytime on **Sunday, June 5th** for a meet and greet. There will be snacks and beverages and perhaps even some kind of game...

See you all at the library!

- Abby

Abigail S. Baines, MLIS
abigail.baines@erving-ma.gov
(413) 422 - 3348 x 1612

Thank you to Jean Daley for her fine work as the interim director, and the rest of the staff and subs who have filled in while the town found a new director!

Library Programs & Events

June 2022

<p>Every first Monday / June 6, 4-6pm</p>	<p><i>Paws to Read</i> </p> <p>A national program with the goal of boosting the confidence of shy readers – By giving them time to practice their reading in front of a non-judgmental listener. Children are paired with a trained, certified, therapy dog and accompanied by the dog handler at all times.</p> <p>Call the library to reserve your spot today!</p>	
<p>Every Thursday 1-2:30 pm</p>	<p><i>Green River Players Ukulele Group</i></p> <p>This group of local musicians continues to play songs of peace and joy every week. You are welcome to bring your ukulele and join them, or to sing along. They also take requests!</p>	
<p>Sunday, June 5th, all day</p>	<p>Meet the Director</p> <p>Join us for refreshments and games as we get to know the new Library Director Abby Baines. We'll be here all day, 10am-4pm.</p>	
<p>Sunday, June 5th, 2-4pm</p>	<p>WMMGA: Soil Health & Soil Testing</p> <p>Workshop with Master Gardener Dave Marinelli. Call to register.</p>	
<p>Thursday, June 9th, 5:30-7 pm</p>	<p>Annual Planter</p> <p>Design and fill a planter with annual flowers. All materials will be provided. Part of the workshop series presented by Teresa Foster of <i>Dry Brook Gardens</i> and funded in part by a grant from the LSTA through the Massachusetts Board of Library Commissioners.</p>	 <p>INSTITUTE of Museum and Library SERVICES</p> 
<p>Thursday, June 16th, 5-7pm</p>	<p>Garden Club & WMMGA: Planting for Food & Pollinators</p> <p>Meets to plant, weed and check on how our garden grows! Stay tuned for more garden programs coming up this summer. The Garden Club moved to evening meeting time this summer in order to join up with the <i>Western Massachusetts Master Gardener Association</i> (WMMGA). Everyone is welcome!</p>	

Library Programs & Events

June - July 2022

<p><u>Kickoff</u> Sunday, June 26th, all day</p> <p><u>Celebration</u> Sunday, August 14th, 2022</p>	<p>Summer Reading Program This infamous program starts Sunday, June 26th and is <i>open to all ages!</i> Sign up and receive a free raffle ticket to the Friends summer raffle. Then, earn more raffle tickets by tracking your reading hours. We have small prizes available for kids throughout the summer and in August we will celebrate all your efforts with a massive party! Trust us, you don't want to miss this!</p>	
<p>Sunday, June 26th, 2-4pm</p>	<p>WMMGA: Composting Workshop with Master Gardener Dave Marinelli of the <i>Western Massachusetts Master Gardener Association</i>. Call to register.</p>	
<p>Thursday, June 30th, 6-7:15pm</p>	<p><i>Stolen Moments</i> Concert: Sarah Clay and the StarCats A free concert by Sarah Clay and the StarCats and it's fun for all ages. Thanks to the Erving Cultural Council for funding this program!</p> 	
<p>Sundays: July 10th, 17th, 24th and August 7th 2-3:30pm</p>	<p>Harmonica Lessons Haven't you always longed to play the harmonica? Come join Rob Fletcher and learn to play <i>Love Me Do</i>, <i>Piano Man</i> and more! Even better, sign up by June 30th and we'll supply the harmonicas! 4 classes on Sundays, July 10th, 17th, 24th, (No class July 31) and August 7th. Funded in part by the Erving Cultural Council.</p>	
<p>Sunday, July 17th, 2-4pm</p>	<p>WMMGA: Gardening in Different Size Gardens - Watching, Watering, Weeding Tips Workshop with the <i>Western Massachusetts Master Gardener Association</i> team. Call to register.</p>	

Library Programs & Events

July 2022

<p>Sunday, July 17th, 1pm</p>	<p>Film Noir: Read & Watch Don't miss the next installment in our series of film noir books and movies: <i>Reckless Moment</i> and <i>Blank Wall</i> by Elisabeth Sanxay Holding. These stories are specially picked for having a strong female character, not the usual femme fatale role. You are welcome to see the movie and enjoy some popcorn with us, even if you haven't read the book. Or pick up a copy to read at the circulation desk! Program presented by Linda Bowden and the Friends of the Erving Public Library.</p>	 <p><i>Reckless Moment</i> is a film based on <i>Blank Wall</i>, written by Elisabeth Sanxay Holding</p>
<p>Thursday, July 21st, 5:30-7pm</p>	<p>Pizza Herb Planter This is a great parent/teen program! Come plant herbs that are just perfect for pizza night. All materials will be provided. Part of the workshop series presented by Teresa Foster of <i>Dry Brook Gardens</i> and funded in part by a grant from the LSTA through the Massachusetts Board of Library Commissioners.</p>	
<p>Sunday, July 24th, 2pm</p>	<p>Travelin' Shoes: A Multicultural Storytelling Extravaganza! This is a great story program with lots of excitement.</p>	
<p>Sunday, July 31st, 2-4pm</p>	<p>WMMGA: Butterflies & Bees Workshop with Master Gardener Larri Cochran of the <i>Western Massachusetts Master Gardener Association</i>. Call to register.</p>	

Collection of the month:

Garden Tool Library!

The Erving Public Library has garden tools available to borrow.

We have shovels, spades, rakes, hoses, carts, soil testers and lots more!

Look for our display or ask at the circulation desk and we will be happy to help you.

The *Garden Tool Library* is made possible through federal funds provided by the Institute of Museum and Library Sciences as administered by the Massachusetts Board of Library Commissioners.

ERVING WATER DEPARTMENT PWS #1091000

2021 CONSUMER AWARENESS REPORT

INSIDE THIS ISSUE:

Consumer Awareness	1
Federal and State Requirements	2
Contaminants	2
Health Terms & Abbreviations	3
Test Results	2/3

Special Points of Interest

- Our drinking water is safe and meets both Federal and State Regulations.
- Erving Water Department has delivered excellent water and services to you over the past year.
- Information about contaminants and health effects can be obtained by calling the EPA's Safe Drinking Water Hotline at 1-800-426-4791.

WATER SOURCES AND SYSTEM OVERVIEW

We're pleased to present to you, this year's Consumer Awareness Report for our monitoring period Jan. 1, 2021 to Dec 31, 2021. We want to keep you informed about the excellent water and services we have delivered to you over the past year. Our goal is and always has been to provide you a safe and dependable supply of drinking water.

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radio-active material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water before we treat it include:

Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.

Inorganic contaminants, (such as salts and metals) which can be naturally-occurring or result from urban storm-water runoff, industrial or domestic wastewater discharges, oil and gas production, mining or farming. Pesticides and herbicides may come from a variety of sources such as agriculture

and residential uses.

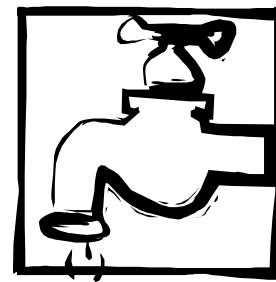

Radioactive contaminants are naturally occurring.

Organic chemical contaminants including synthetic and volatile organic chemicals. These are by-products of industrial processes and petroleum production. They can also result from gas stations, urban storm-water runoff, and septic systems.

Groundwater is the source for the Erving Water Department. Well #1 is located off of River Road, which is an aquifer formed by a deep, narrow buried river valley. This is an ancient location of the Connecticut River Valley (pre-glacial). The well and storage tank were constructed and brought on line in 1983 and was recently re-coated inside and out in the Fall of 2009. Many drinking water sources in New England are naturally corrosive (i.e. they have a pH of less than 7.0). For this reason, it is beneficial to add chemicals that make the water neutral or slightly alkaline. The Erving Water Department adds sodium hydroxide to its water to adjust the water to a non-corrosive pH.

The Water Department has a source Water Assessment Plan, a Well Head Protection Plan, and an Emergency Response Plan. In addition, Erving's Board of Health has adopted a floor drain regulation for the Zone II area of the well.

The Erving Water Department maintains a cross-connection and back flow testing and surveying program on an on-going basis. In our continuing efforts to maintain a safe and dependable water supply, it might be necessary to make improvements to our water system. The costs of these improvements may be reflected in the rate structure. Rate adjustments may be necessary in order to address these improvements.

ERVING WATER DEPT. TEST RESULTS FOR 2021 DETECTION OF CONSTITUENTS

We routinely monitor for drinking water contaminants. In 2021 one routine monthly sampling showed the presence of Total Coliform bacteria. The system was chlorinated and the re-sampling showed no coliform bacteria. DEP has prepared a Source Water Assessment Program (SWAP). This report can be made available on our website at www.erving-ma.org

*OR
<http://www.mass.gov/eea/agencies/massdep/water/drinking/source-water-protection-for-drinking-water-supplies.html#7>*

Our system was assigned a susceptibility ranking of 'high' using the information collected during the assessment by MassDEP

Regulated Contaminant	Date(s) Detected	Highest Result or Highest Running Average Detected	Range Detected	MCL or MRDL	MCLG or MRDLG	Violation (Y/N)	Possible Source(s) of Contamination
Gross Alpha (pCi/L)	8-02-15	-0.118	N/A	15	0	N	Erosion of natural deposits
Radium 226 & 228 (pCi/L)	7-13-15	0.33	N/A	5	0	N	Decay of natural manmade deposits
Nitrate (ppm)	4-15-21	0.235	N/A	10	10	N	Runoff from fertilizer use; leaching from septic tanks; sewage; erosion of natural deposits
Barium (ppm)	5-21-20	0.034	N/A	2	2	N	Erosion of natural deposits

Most data in these tables are from Jan. 1, 2021 to Dec. 31, 2021. We monitor for some contaminants less than once per year. As a result, some of our data through representative, is more than a year old. For those contaminants the date of the last sample is shown in the table.

Unregulated and Secondary Contaminants	Date(s) Collected	Result or Range Detected	Average Detected	SMLC	ORSG	Possible Source
Sodium (ppm)	2021	15.9 to 37	27.76	N/A	20	Natural sources; runoff from us as salt on roadways; by-product of treatment process
Calcium (ppm)	2020	5.83 to 9.83	8.63	N/A	N/A	N/A
Chloride	2020	20.2-45.3	36.5	N/A	N/A	N/A

Unregulated contaminants are those for which there are no established drinking water standards. The purpose of unregulated contaminants monitoring is to assist regulatory agencies in determining their occurrence in drinking water and whether future regulation is warranted.

FEDERAL AND STATE REQUIREMENTS

In order to ensure that tap water is safe to drink, the Department of Environmental Protection (MassDEP) and U.S. Environmental Protection Agency (EPA) prescribe regulations that limit the amount of certain contaminants in water provided by public water systems. The food and Drug Administration (FDA) and Massachusetts Department of Public Health (DPH) regulations establish limits for contaminants in bottled water that must provide the same protection for public health. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the EPA's Safe Drinking Water Hotline (800-426-4791).

CONTAMINANTS

Some people may be more vulnerable to contaminants in drinking water than the general population. Immune-compromised individuals (cancer patients undergoing chemotherapy, organ transplant recipients, people with HIV/AIDS or other immune system disorders), some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline, 1-800-426-4791. If you have questions about this report or concerning the Water Department, please contact Pete Sanders, system operator, at 413-422-1200. The Water Commissioners have regular scheduled meetings on Mondays beginning at 7:00 p.m. at the Erving Senior & Community Center located at 1 Care Drive.

All test results are available by contacting Erving Water Dept. **413-422-1200**

HEALTH TERMS AND ABBREVIATIONS

In the table you will find many terms and abbreviations you might not be familiar with. To help you better understand, we've provided the following definitions:

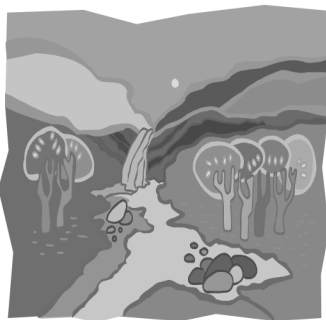

- ◆ Maximum Contamination Level or MCL: The highest level of a contaminant in drinking water. MCLs are set as close to MCLGs as feasible using the best available technology.
- ◆ Maximum Contamination Level Goal or MCLG: The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.
- ◆ Non-Detects (ND) : Laboratory analysis indicated that the constituent is not present.
- ◆ Action Level (AL): the concentration of a contaminant which, when exceeded, triggers treatment or other requirements which a water system must follow.
- ◆ n/a: not applicable
- ◆ nd: not detectable at testing limit
- ◆ ppb: parts per billion or micrograms per liter
- ◆ ppm: parts per million or milligrams per liter
- ◆ pCi/l: picocuries per liter (a measure of radiation)

“MCLs are set at very stringent levels. To understand the possible health effects described for many regulated constituents, a person would have to drink two (2) liters of water everyday at the MCL level for a lifetime to have a one-in-a-million chance of having the described health effect.

PFAS

Erving Water Dept. has conducted three rounds of PFAS Testing. All results were ND (not-detected).

NEWLY REVISED FEDERAL LEAD AND COPPER RULE

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The Erving Water Department is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>.

WE HAVE MET THE REQUIREMENTS AND ARE PRESENTLY IN A REDUCED SAMPLING AND TESTING SCHEDULE, THIS INCLUDES FIVE SAMPLES FROM THE SYSTEM EVERY THREE YEARS.

	Date(s) Collected	90 TH percentile	Action Level	MCLG	# of sites sampled	# of sites above Action Level	Possible Source of Contamination
Lead (ppb)	9-24-21	0.00145	15	0	5	0	Corrosion of household plumbing systems; Erosion of natural deposits
Copper (ppm)	9-24-21	0.0856	1.3	1.3	5	0	Corrosion of household plumbing systems; Erosion of natural deposits; Leaching from wood preservatives

RESULTS ARE FROM September 2021 TESTING. THE LIKELY SOURCE FOR CORROSION IS HOUSEHOLD PLUMBING. 90% MEANS THAT FOR EVERY 10 TEST SITES, 9 ARE AT OR BELOW THAT NUMBER. ACTION LEVEL MEANS THAT THE CONCENTRATION OF A CONTAMINANT THAT, IF EXCEEDED, TRIGGERS TREATMENT OR OTHER REQUIREMENTS, THAT A WATER SYSTEM MUST FOLLOW.

ERVING COMMUNITY AND BUSINESS NEWS

CONSERVATION COMMISSION NEWS

On April 23rd a dozen residents of Erving picked up trash along a section of Old State Road frequently littered as well as sections at the East and West ends. They removed approximately 10 bags of trash, cans, bottles, and other material. In the week prior the state highway department had assisted by removing tires that had been left there as well.

The effort was coordinated by the Erving Conservation Commission with supplies, tools, and pickup by the town.

The Poplar Mountain trails were surveyed for needed trail work during the week and are all clear and usable.

A similar effort is under consideration for the fall.

Please Don't Litter.
