Introduction

The Towns of Northfield and Erving are concerned about safety, accessibility and pavement condition as a result of the number of heavy commercial vehicles traveling on Church Street and North Street in Erving, and on Gulf Road in Northfield. This Heavy Commercial Vehicle Exclusion (HCVE) study has been prepared to justify the exclusion of heavy trucks along these roadways, thereby improving safety and vehicle operations, while reducing necessary maintenance.

Residents and local officials believe that the adoption of GPS map services available to the general public has resulted in an increase in commercial vehicle traffic on these local roadways, directing vehicles destined north to New Hampshire or Vermont to divert from Route 2 onto these roads rather than to continue on to Route 63, a state-numbered route. Some GPS services direct travelers bound for Interstate 91 Northbound to use North Street/Gulf Road, then Maple Street & Main Street to Route 10 westbound in Northfield.

While both communities are concerned with heavy commercial vehicle traffic on these roadways, the issues posed by said traffic differ due to the different character of the roads in each community. In Erving, there are concerns about the volume and speed of heavy trucks on the residential streets of Church Street and North Street, and the risks posed to pedestrians and local traffic. In Northfield, there are concerns about the safety of heavy trucks maneuvering steep roadway grades on Gulf Road. The narrow shoulders, steep side slopes and horizontal curves on Gulf Road were not designed for large commercial trucks and can be icy and treacherous for such vehicles in the winter. Residents and local officials in Northfield have described multiple instances of trucks forcing passenger cars out of their travel lane because the larger vehicles are unable to maneuver through curves and stay in their own travel lane. They also report that some trucks are unable to climb the hills in wet or icy weather.

An HCVE is subject to the approval of the Massachusetts Department of Transportation (MassDOT) and will only be granted if certain criteria are met. These criteria are described in the Massachusetts Amendments to the Manual on Uniform Traffic Control Devices (MA-MUTCD) and are outlined following.

The MA-MUTCD criteria for an HCVE states that a truck exclusion from a municipal way may be authorized if a suitable alternate route is available. If the alternate route does not lie wholly within one community, the exclusion must have the written support of both communities. A suitable alternate route to the study area roadways is available on Route 2

and Route 63, and the exclusion has the support of both communities. This report will demonstrate that an HCVE is warranted according to the MassDOT engineering guidelines.

Exclusion Criteria

Per the MA-MUTCD, the following must be included in an engineering study in support of an HCVE:

- A. 24-hour traffic counts along the subject roadways, broken into ½ hour intervals;
- B. A map of the area with excluded street(s) marked in red and alternate route marked in green;
- C. A description of the physical characteristics of the subject roadways;
- D. A description of the types of buildings or property abutting the subject street(s);
- E. A description of the municipal zoning of the subject roadways;
- F. An explanation of the proximity of the probable alternate route, including the additional distance to be traveled;
- G. A description of existing traffic control on the subject street(s);
- H. A description of the hours during which the exclusion is to be in effect;
- I. A demonstration that the requested HCVE meets the warrant criteria in the MA-MUTCD, and;
- J. A written statement from the municipalities as to the need for the exclusion, and acknowledgment of acceptance of the responsibility for installation and maintenance of appropriate signage.

The following sections of this report will provide the information required in items A through I. Item J, written statements from the municipalities involved, will accompany the submittal of this report.

According to the MA-MUTCD guidelines, an HCVE would not apply to heavy commercial vehicles destined to or originating from locations along the subject area roadways while delivering or collecting goods, materials, or merchandise from abutting land uses. Additionally, the HCVE would not apply to vehicles used for construction, maintenance, or repair of the subject roadways or public utilities within the subject area. Finally, the HCVE would not apply to federal, state, municipal or public service vehicles such as ambulances, school buses, or utility trucks.

Existing Conditions

Study Area Roadways

The area under study consists of the following roadways:

- Church Street, Erving, from Route 2 to North Street
- North Street, Erving, from Route 2 to Northfield Town Line
- Gulf Road, Northfield, from Erving Town Line to Commonwealth Avenue/Maple Street

A map of the area is provided in Figure 1. The roadways to be excluded from truck traffic are marked in red and the proposed alternate route is marked in green.

Church Street

Church Street is laid out from Route 2 in the central village of Erving north to its intersection with North Street. It is approximately 0.21 miles long and is classified as a rural major collector. The pavement surface is approximately 20 ft wide with one travel lane in each direction separated by a double yellow center line and white edge lines delineating narrow shoulders. There is a concrete sidewalk on the west side of the street, separated from the pavement by a grass strip area. The pavement is in fair to poor condition, with minor and intermediate alligator cracking along the length of the roadway. There is a bridge over Keyup Brook at the southern end of Church Street that is posted with weight limits; the traffic counts discussed in a later section of this report indicate that trucks are disregarding this posting.

Church Street is zoned as central village/village residential in the town of Erving and is populated by closely spaced homes. The Erving Fire Department is located at the southeast corner at the intersection with Route 2 and there is a small park and playground adjacent to the Fire Department on Church Street. The speed limit is 25 mph in both directions and there is a slight uphill grade traveling to the north. Church Street is STOP controlled at its intersection with Route 2, and also at its intersection with North Street.

Figure 2. Church Street, facing north at its intersection with Route 2 in Erving

North Street

There are two distinct segments of North Street in Erving, a northern segment and a southern segment. From Route 2 north to the intersection with Church Street (approximately 0.2 miles), the southern segment of the road is zoned as central village/village residential and is populated by closely spaced homes. There is a small grocery market on the southeast corner at Route 2, and a restaurant across the street on the southwest corner. This segment of North Street is approximately 24 ft wide with a double yellow center line, white edge lines, and a concrete sidewalk adjacent to the east side of the roadway. The pavement is in fair condition, with some minor cracks.

Figure 3. North Street facing north between Route 2 and Church Street in Erving

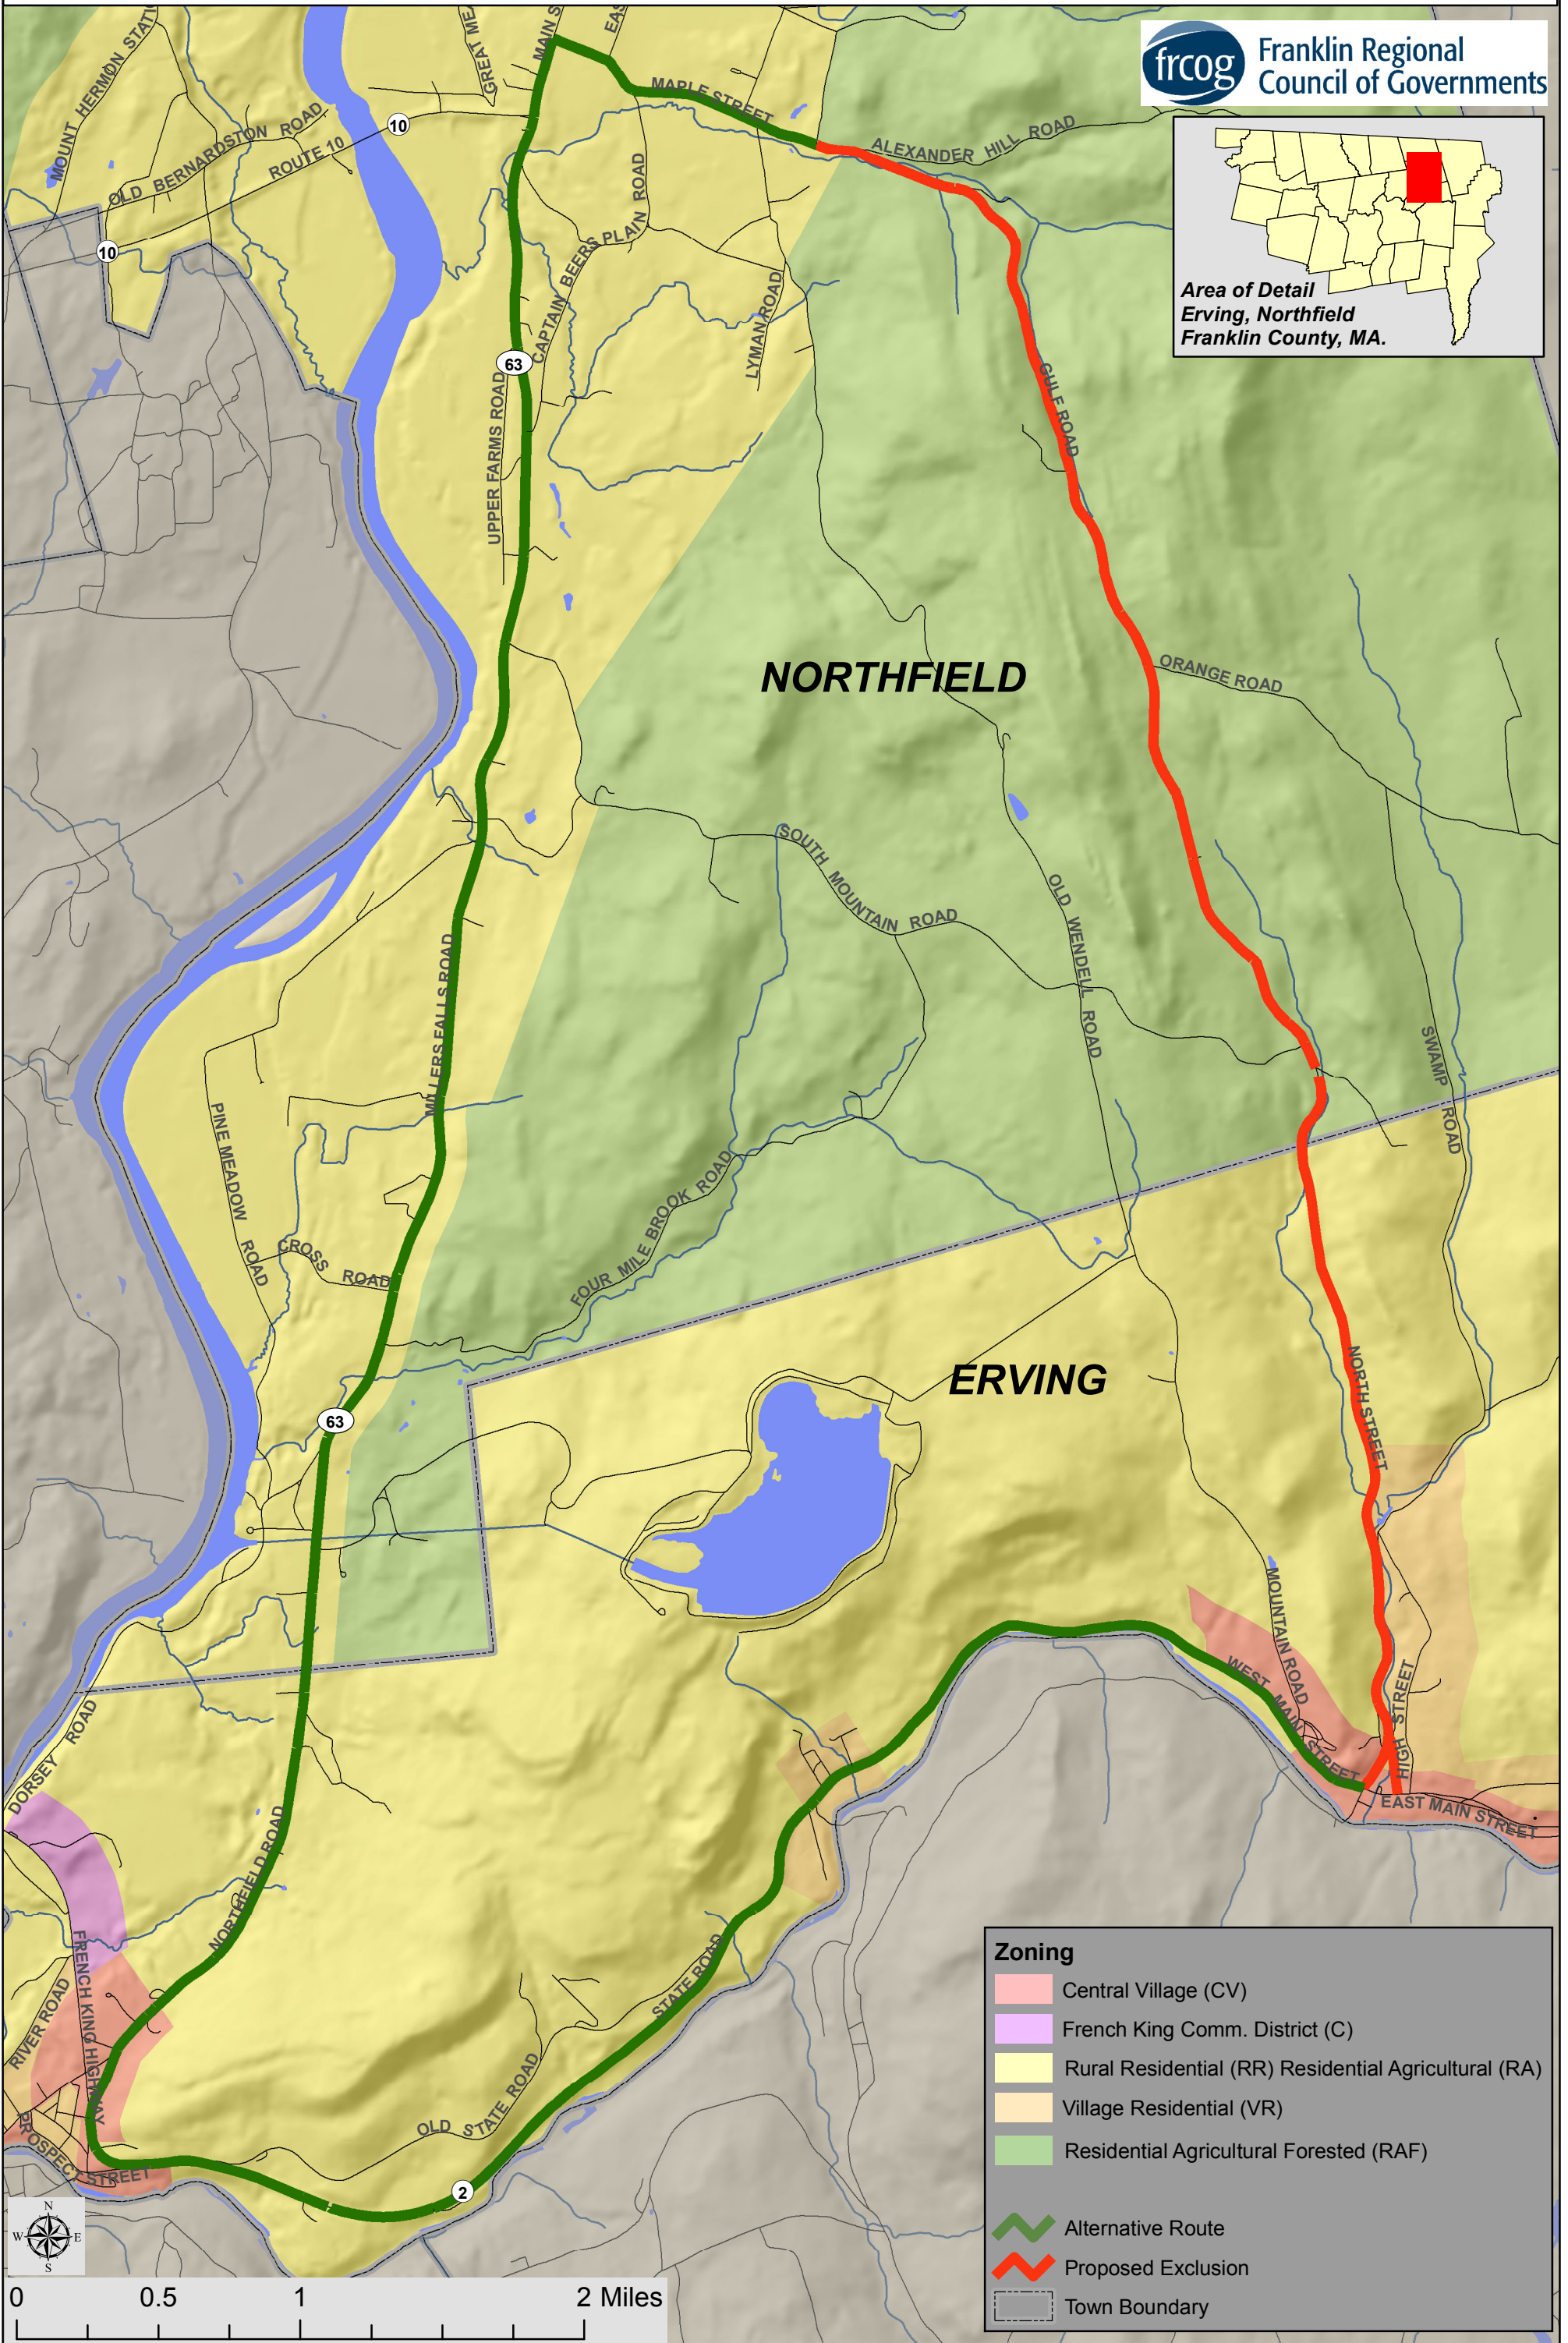

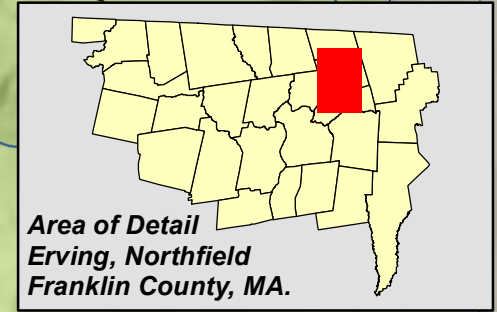

There is a crosswalk across North Street at the intersection with Church Street, where there is a school bus stop. This intersection is STOP controlled on Church Street, while through traffic on North Street has the right-of-way. The southern segment of North Street is classified as a local roadway with a speed limit of 25 mph. There is a slight uphill grade traveling to the north. North Street is STOP controlled at the intersection with Route 2.

The northern segment of North Street, from north of Church Street to the Erving/Northfield town line (approximately 2.21 miles), is classified as a rural major collector and is zoned village residential/rural residential. Houses are more thinly spaced and most of the adjacent land is forested. The speed limit increases to 35 mph in both directions north of Flagg Road and the roadway features a rolling but rising grade traveling north. The steepest grade on the northern segment of North Street is approximately 9%, approximately ½ mile south of the Northfield town line.

The pavement on the northern segment of North Street is approximately 22 feet wide, with little to no effective shoulder. There is a double yellow center line and white edge lines on either side of the roadway and several sections of guardrail where there are steep slopes away from the road. There is a reduced salt area warning sign and curve warning signs posted. The pavement is in good to fair condition.

Church St, North St, Gulf Rd, Heavy Commercial Vehicle Exclusion, Erving & Northfield

Figure 1. Proposed Heavy Vehicle Exclusion & Alternate Route

Gulf Road

Gulf Road begins at the Erving/Northfield town line and continues to Commonwealth Avenue, where the name changes to Maple Street. It is classified as a rural major collector for its entire length, approximately 4.3 miles. For most of its length, Gulf Road is approximately 22 ft wide, but it narrows south of Pratt Hollow Road to approximately 20 ft wide. There is less than 12 inches of shoulder on either side of the roadway. The pavement is generally in poor to fair condition apart from a segment between Pratt Hollow Road and Commonwealth Avenue that was resurfaced in the summer of 2018.

Gulf Road is in a residential/agricultural/forested zoning area in the town of Northfield. Houses along the roadway are thinly spaced and most roadside land is forested. There are steep uphill and downhill slopes at various points along Gulf Road, with guardrail protecting the downhill slopes away from the roadway. There are multiple horizontal curves as well as steep vertical grades over the length of the road. The steepest grade is 11%, north of Prospect Hill Road. There is a grade warning sign at the crest of a vertical curve near Orange Road, where the vertical grade is approximately 6%, as well as a horizontal curve. There are also signs warning “caution icy road”. The posted speed limit is 35 mph. There are no traffic controls at either end of Gulf Road within the study area.

Figure 4. Gulf Road, Northfield

Traffic Counts

Automatic traffic recorder (ATR) counts were performed at the following locations and dates:

- North Street, between Route 2 and Church Street, August 21 to August 29, 2018;
- Church Street, between Route 2 and North Street, May 10 to May 18, 2016;
- Gulf Road, north of Erving Town Line, May 2 to May 10, 2018.

The ATR counts were used to determine the average daily traffic and the percentage of heavy vehicles. Table 1 summarizes the recorded ADT and percentage of heavy vehicles; complete ATR reports are provided in Appendix A. On Church Street and on Gulf Road, the percentage of heavy vehicles northbound is 10% or higher.

Table 1. Vehicle Volumes [vpd]

Street	Direction	ADT	% Cars + Motorcycles	%2-axle Pick-up Trucks	Heavy Vehicles			Total % HV
					%2-axle, 6-Wheel Trucks	%Buses	%3+axle trucks	
North Street	NB	201	69%	21%	3%	0.1%	4%	7%
	SB	276	72%	20%	3%	0.1%	1%	3%
Church Street	NB	608	70%	18%	8%	1%	2%	10%
	SB	561	71%	21%	3%	1%	2%	6%
Gulf Road	NB	676	66%	19%	12%	1%	2%	15%
	SB	606	72%	20%	6%	1%	1%	8%

Vehicle Speed

Vehicle speeds were also recorded in the ATR counts at the locations and dates described in the previous section. As the counts were conducted over 24-hour periods, the speeds recorded include non-peak times of day when vehicle speeds are not influenced by other traffic. The average and 85th percentile speeds are presented in Table 2. The speed data indicates that vehicles are exceeding the posted speed limits on Church Street and Gulf Road. It can be inferred that the speed limit is being exceeded on North Street between Church Street and Gulf Road as well.

Table 2. Vehicle Speeds [mph]

Street	Direction	Speed Limit	Avg. Speed	85 th % Speed
North Street	NB	25	25	30
	SB	25	25	29
Church Street	NB	25	31	37
	SB	25	29	34
Gulf Road	NB	35	44	49
	SB	35	44	49

Crash History

One of the concerns regarding the presence of heavy commercial trucks on the subject roadways is safety. Crash records obtained from the Massachusetts Registry of Motor Vehicles (RMV) show that between 2002 and 2016 (the most recent year for which crash records are available) there were 49 crashes reported on the subject roadways. Nine of these, or 18 percent, have involved at least one truck. The records do not include at least two truck crashes that have occurred on Gulf Road since 2016. In addition, local residents

have reported anecdotally about trucks that have either run off the road or forced other passenger cars off the road, incidents that did not result in a crash report being filed but which indicate a detriment to traffic safety. Crash records are provided in Appendix B.

Heavy Commercial Vehicle Exclusion Warrant Analysis

The MA-MUTCD lists three HCVE warrants, at least one of which must be met to justify a truck exclusion. The warrants are as follows:

1. A volume of heavy commercial vehicles, which is usually in the range of 5% to 8%, reduces the utilization of the facility and is cause for a substantial reduction in capacity or safety.
 - a. **This warrant is MET.** The percent of heavy vehicles in the northbound direction (see Table 1) is 7% on North Street, 10% on Church Street, and 15% on Gulf Road. The presence of trucks has resulted in a reduction in safety and utilization, as indicated by the crash records and local knowledge.
2. The condition of the pavement structure of the route to be excluded indicates that further repeated heavy wheel loads will result in severe deterioration of the roadway.
 - a. **This warrant is MET.** The pavement structure of the subject roadways was designed for local traffic and is showing signs of deterioration.
3. Notwithstanding the foregoing, in certain instances where land use is primarily residential in nature and a municipality has requested exclusion only during hours of darkness, a specific night exclusion may be granted.
 - a. **This warrant is not applicable.** A night exclusion is not requested.

Proposed Improvements

With the goal of excluding heavy commercial vehicles from the subject roadways, this study recommends the following traffic operation improvements:

Heavy Commercial Vehicle Exclusion Zone

Prohibit heavy commercial vehicle traffic on Church Street and North Street in Erving and on Gulf Road in Northfield. The exclusion will be enforced by posting signs at the entrances to Church Street and North Street at Route 2 in Erving, on Gulf Road at Commonwealth Avenue and on Maple Street at Main Street in Northfield. Proposed sign options as listed in the MUTCD include No Trucks symbol (R5-2), No Trucks word message (R5-2a), or No Commercial Vehicles (R5-4). A sign assembly on Maple Street at Main Street (Routes 10/63)

in Northfield should include a supplemental sign with “On Gulf Road” word message below a No Trucks sign to indicate that through traffic from heavy vehicles is prohibited.

Alternate Heavy Commercial Vehicle Routes

Provide an alternate route for heavy commercial vehicles by posting truck route signs on Route 2, Forest Street, and Route 63 in Erving. The proposed alternate route consists primarily of state numbered routes that were designed to carry a higher volume of heavy vehicle traffic. These signs can also indicate that this is the truck route to follow to reach I-91 Northbound via Route 10 Westbound in Northfield.

The length of the route to be excluded, from the intersection of Route 2 at Church Street in Erving to the intersection of Gulf Road and Commonwealth Avenue in Northfield, is approximately 6.7 miles. The distance along the proposed alternate route from the same start and end points is approximately 14.8 miles, an additional 8.1 miles. However, because the posted speed limits on Route 2 and Route 63 are higher than those posted on the route to be excluded, the difference in travel time is only approximately 3 minutes longer on the alternate route.

Conclusion

There are safety, accessibility, and pavement condition concerns resulting from the prevalence of heavy vehicles traveling on Church Street and North Street in Erving and on Gulf Road in Northfield. The affected area is comprised primarily of residential land use. This study, requested by the Towns of Erving and Northfield, has demonstrated that percentage of heavy vehicles northbound on Church Street and Gulf Road exceeds the 8% threshold in the MA-MUTCD warrants and that such vehicles are a detriment to local traffic safety and operations.

An alternate route for heavy vehicles has been identified. Eliminating the heavy truck traffic from the study roadways as proposed will improve traffic safety and extend the serviceable life of the pavement. The truck exclusion will be implemented, maintained, and enforced by the Towns of Erving and Northfield. In accordance with the MA-MUTCD, the requested exclusion will not apply to commercial vehicles originating from or destined for locations along the study roadways, nor to vehicles used for construction, maintenance or repair of the study roadways or public utilities abutting said roadways, nor to federal, state, municipal, or public service vehicles.
